

Overview of sustainability results in liquidity portfolio Q1/2022

31.3.2022

MuniFin

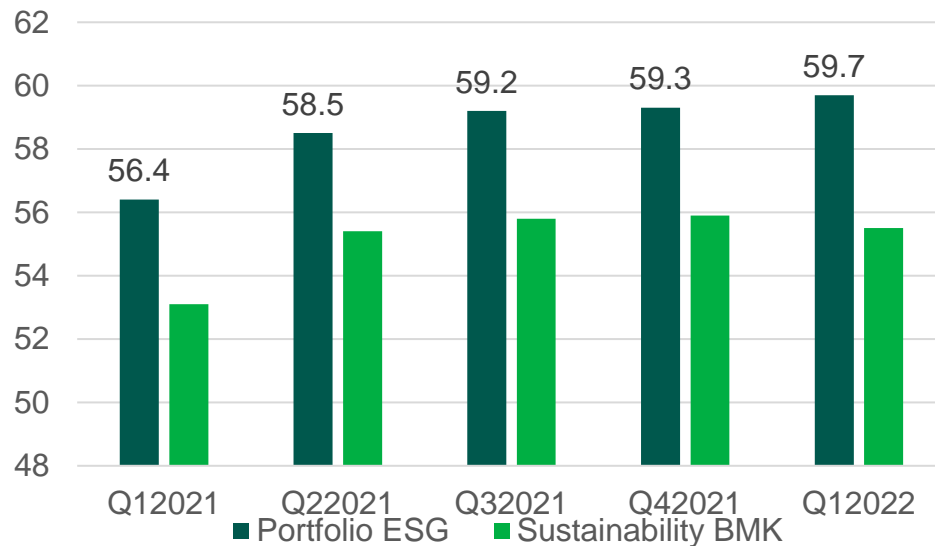

Portfolio ESG risk rating vs sustainability benchmark

MuniFin has established a material risk indicator for the average ESG score of the portfolio in its Risk Appetite Framework (RAF). The RAF indicator suggests that the average ESG score of the portfolio should be above the sustainability benchmark.

Sustainability benchmark is composed of relevant market indices replicating the actual portfolio weights in each asset class.

Portfolio ESG vs Sustainability Benchmark

Sustainable thematic investing

Munifin has set a target share of its sustainable investments (green and social bonds) in its portfolio versus the market index.

The share of eligible sustainable assets in the liquidity portfolio shall be significantly above the market rate, which is the share of sustainable assets in a weighted composition of relevant market indices.

Sustainability Bond Rate vs Benchmark
